

CUSTOM E-COMMERCE PACKAGE

Store Front Design

As part of our package we will design your logo, custom colors and a look & feel that will represent your business colors or existing corporate identity. We will incorporate all existing designs as well as enhance and update them.

Fully Customized Design

The look and feel of your store is designed by our team based on your requirements. We offer you 3 different final designs after our initial consultation and you can choose one of the 3. Usually we can develop the front end the client's requirements the first time through.

Design Concepts

We are constantly updating our design concepts to incorporate the most recent breakthrough programming techniques and languages. Our code is fast and very powerful. We use Java and SQL database.

Existing Site Integration

If you already own a site, we will integrate the store into your existing site as part of our offering.

Browse Feature

We offer browse by Category, Manufacture, price and keywords. Additional custom browsing is available to make the purchasing process completely seamless and easy. Our Search and find feature is completely customizable based on your specific requirements, however basic search is based on Manufacture, Category and pricing or text content of the pages.

Customized Registration

Existing customers can log in at anytime and view all previous orders. Tracking and pay status for every transaction is recorded and kept for viewing.

Best Sellers

You may choose products as best sellers to showcase in the store for quick sale and customer service.

Thumbnails and Large View images

our site design allows for thumbnail and large view of your product fotos. Unlimited photos for each product can be loaded.
